

Proceedings

8th International VDZ Congress

26 – 28 September 2018

Duesseldorf

2018

Content

Foreword	5
Keynote Session	6
The Cement Plant of the Future - Innovation and Technical Trends in Cement Production	7
<i>Albert Scheuer, HeidelbergCement</i>	
Technical Trends and Innovation in the Construction Sector	29
<i>Jérôme Stubler, VINCI Construction</i>	
Concrete and its Digital Fabrication	31
<i>Robert Flatt, ETH Zurich</i>	
The Cement Industry on the Way to a Low Carbon Future	55
<i>Martin Schneider, VDZ</i>	
The Global Cement and Concrete Association: One Global Cement and Concrete Voice	73
<i>Frank Rossini, GCCA</i>	
Session: Digital Measures and Projects	82
Big Data Analysis in the Cement Industry	83
<i>Fokion Tasoulas, TITAN Cement Group</i>	
Digital in Heavy Building Materials – Starting the Transformation at HeidelbergCement	97
<i>Roman Lentz, HeidelbergCement</i>	
Digitalization – Leverage Operational Efficiency in the Cement Industry	99
<i>Yun Zeng / Ömer Oydasik, Siemens</i>	
Industrial Internet of Things – A Roller Mill Solution as an Example	107
<i>Georg Locher, thyssenkrupp Industrial Solutions</i>	
Digital Transformation: A Survey of the German Cement Industry	118
<i>Max Ellerich, RWTH Aachen</i>	
How to Approach Data Evaluation in the Cement Industry Systematically	132
<i>Philipp Fleiger / Martin Schneider, VDZ</i>	
Session: Sustainability and Climate Change	144
Max Captive Power and Clinker Production	145
<i>Albrecht Wolter / Jessica Thiess, TU Clausthal</i>	
Calix Process CO ₂ Separation Technology and the LEILAC Project	156
<i>Phil Hodgson, Calix</i>	
Verifying the Potential of Integrated Calcium Looping for Low- CO ₂ Cement	171
<i>Stefano Consonni, Politecnico di Milano</i>	
Conversion of CO ₂ - A Techno-economic Assessment	186
<i>Remi Chauvy, Université de Mons (UMONS)</i>	
Low Carbon Energy and Feedstock for the European Chemical Industry	202
<i>Kurt Wagemann, DECHEMA</i>	
CO ₂ Emission Reduction by Using CO ₂ from the Cement Industry: Myths and Facts	216
<i>Carlos Abanades, Consejo Superior de Investigaciones Científicas (CSIC)</i>	

Session: Environmental Protection Measures	228
HD-SCR Kiln 2, Goellheim plant – Course of Action, Concept and Operational Experiences	244
<i>Rüdiger Matheis, Dyckerhoff</i>	
The Research Progress on NH ₃ -SCR Technology and its Application in China	257
<i>Wang Lan, China Building Materials Academy CBMA</i>	
Emissions Reduction by Means of Efficient Combination of DeCONO _x , Xmercury and Sludge Drying Systems	270
<i>Jürgen Thormann / Richard Morris, Schwenk Zement</i>	
Mercury Balances in the Cement Industry	285
<i>Stefan Schäfer / Volker Hoenig / Robin Harraß, VDZ</i>	
Continuous Process Gas and Mercury Emission Monitoring	300
<i>Felix Bartknecht, SICK</i>	
Session: Grinding Technology	316
Trends in Grinding Technologies (Report from VDZ's Working Group Grinding Technology)	317
<i>Michael Müller-Pfeiffer, Dyckerhoff / Philipp Fleiger, VDZ</i>	
Wide Range of Applications – Operational Results of MVR Mills	329
<i>Caroline Woywadt, Gebr. Pfeiffer</i>	
Grindability Investigations of Innovative Cement Composite Materials in VRM-Grinding Plants	341
<i>Winfried Ruhkamp, Loesche</i>	
Nuh Çimento's Largest Upgrade Project in Europe with KHD Roller Press Technology	362
<i>Ilker Avci, Nuh Çimento</i>	
Separate (Ultra-) Fine-Grinding of Cement	379
<i>Kevin Treiber, VDZ</i>	
Session: Burning Technology	391
Waste Heat Power Generation – From Concept to Operation	392
<i>Cristian Voinitchi / Michael Principato, HeidelbergCement</i>	
Investigations on Alternative Fuel Combustion at the Main Firing	405
<i>Nils Bodendiek / Stefan Schäfer, VDZ</i>	
Drying High Moisture RDF at Souselas	I 16
<i>Francisco Leitão, Cimpor</i>	
Retrofitting the Duna-Dráva Cement Plant in Vác for Higher AFR Utilization Demonstrating Improved Environmental Performance	434
<i>Zsolt Szilágyi / László Szabó, Duna-Dráva Cement</i>	
5 Years Operational Experience with the Prototype Prepol-SC	I 44
<i>Florian Trela, Holcim (Deutschland)</i>	
Capacity Boost and Energy Savings – With Counter Current Heat Exchanging Cyclone	I 54
<i>Mads Nielsen / Anders Skærlund Petersen, FLSmidth</i>	

Session: Cement and Concrete	468
LC3 – Limestone and Calcined Clay Concrete	469
<i>Karen Scrivener, École Polytechnique Fédérale de Lausanne (EPFL)</i>	
CSA Cement in China	503
<i>Sui Tongbo, Sinoma</i>	
Progress in the Development of Ternocem – A Belite Yeélimite Cement	526
<i>Wolfgang Dienemann, HeidelbergCement</i>	
Recarbonation of Concrete – Climate Benefit and Environmental Issues	541
<i>Jesper Sand Damtoft, Aalborg Portland</i>	
Solidia Technologies – An Example of Carbon Capture and Utilization	553
<i>Vincent Meyer, LafargeHolcim</i>	
Performance-based Specifications for Concrete	563
<i>Christoph Müller, VDZ</i>	

Please cite the proceedings of the 8th International VDZ Congress 2018 as follows:

Name of the author(s): Title of the presentation.
